
US Wildfire Analysis

ECE 143 Fall 2020

Team 4:

Schuchen, Elakkia, Jack, Jessi

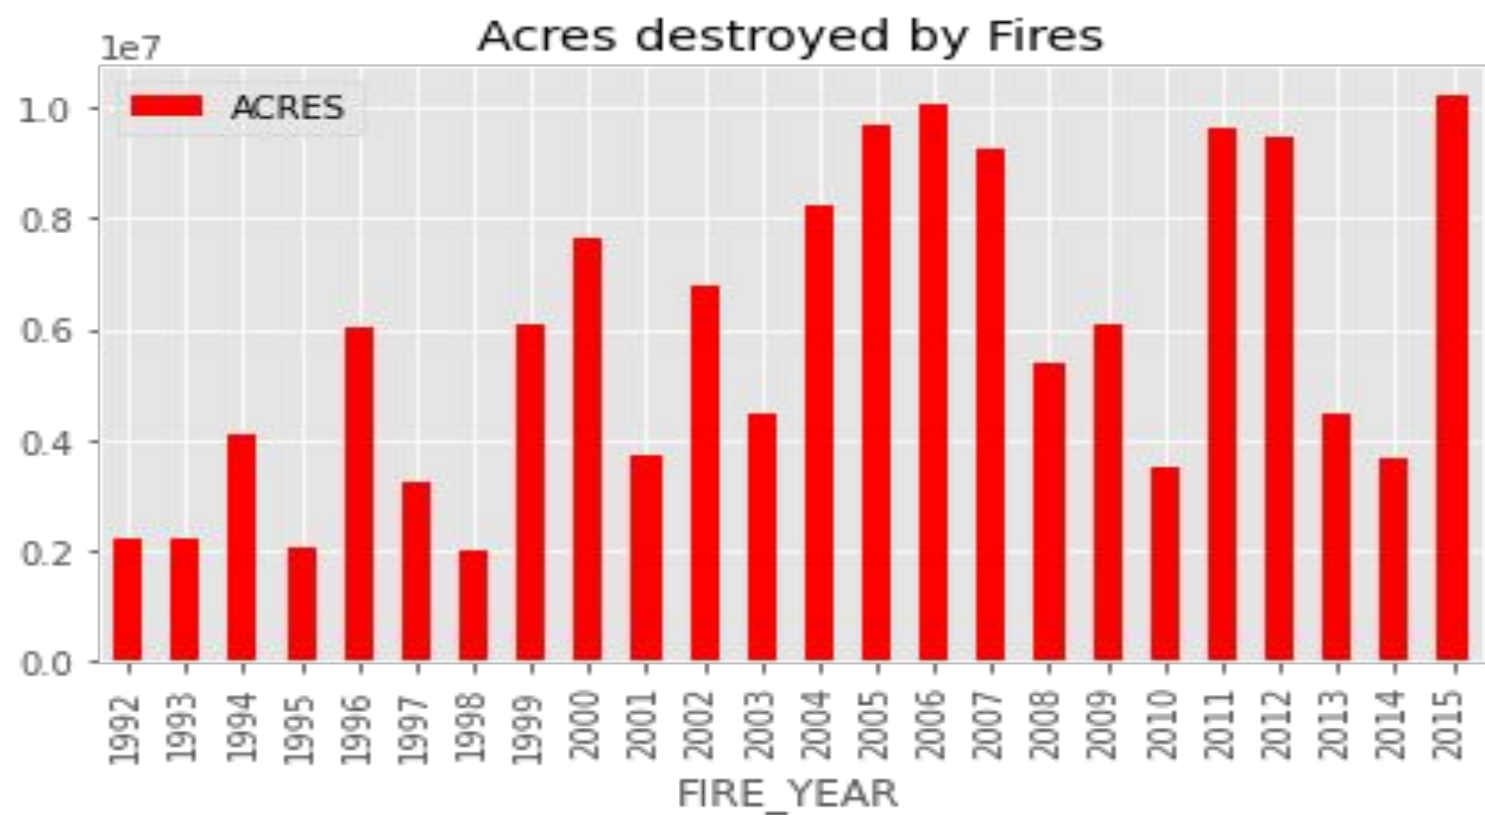

Overview

- Have the fires in the United States increased over time?
- Which states suffer most from forest fires?
- Causes of fires

General Analysis

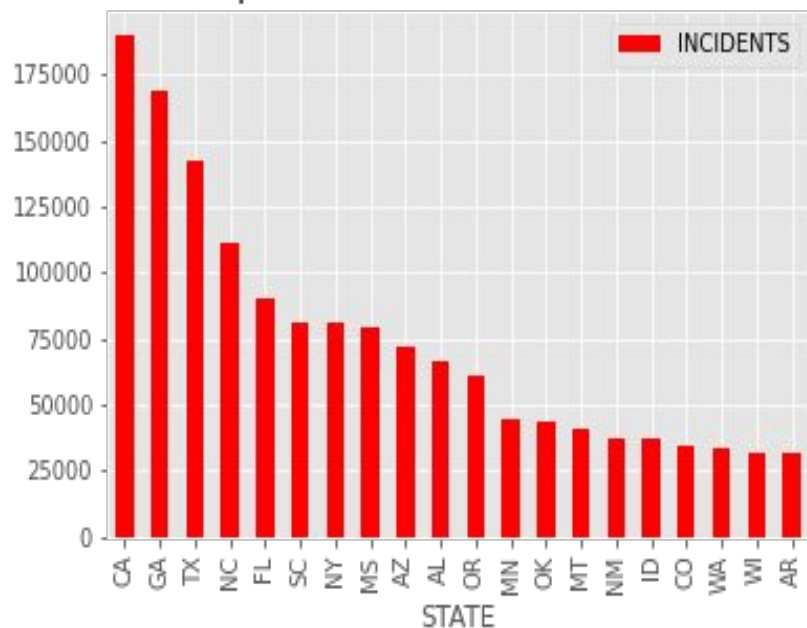

Frequency of Fires 1992 to 2015

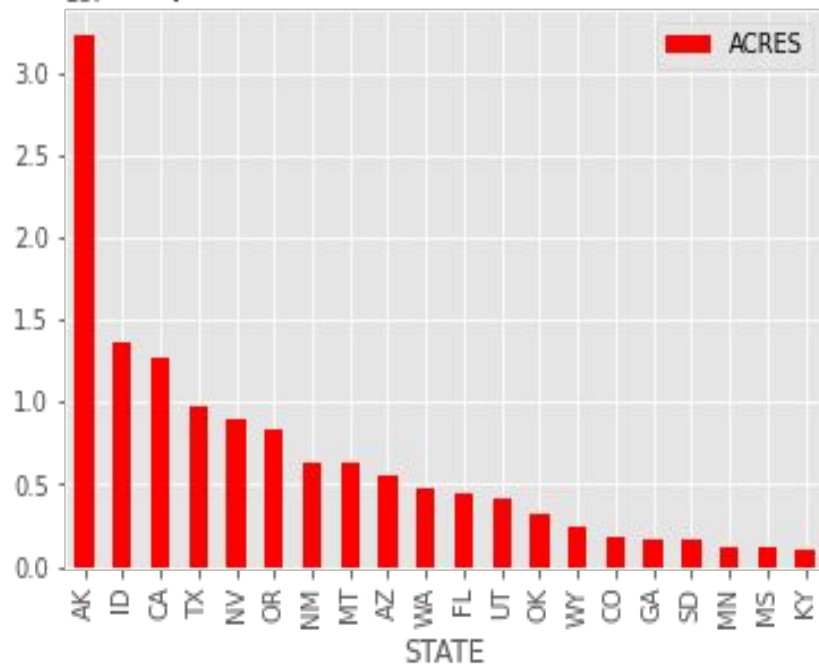

States - Size & Number of Incidents

Top 20 states with most incidents

1e7 Top 20 states with most area affected

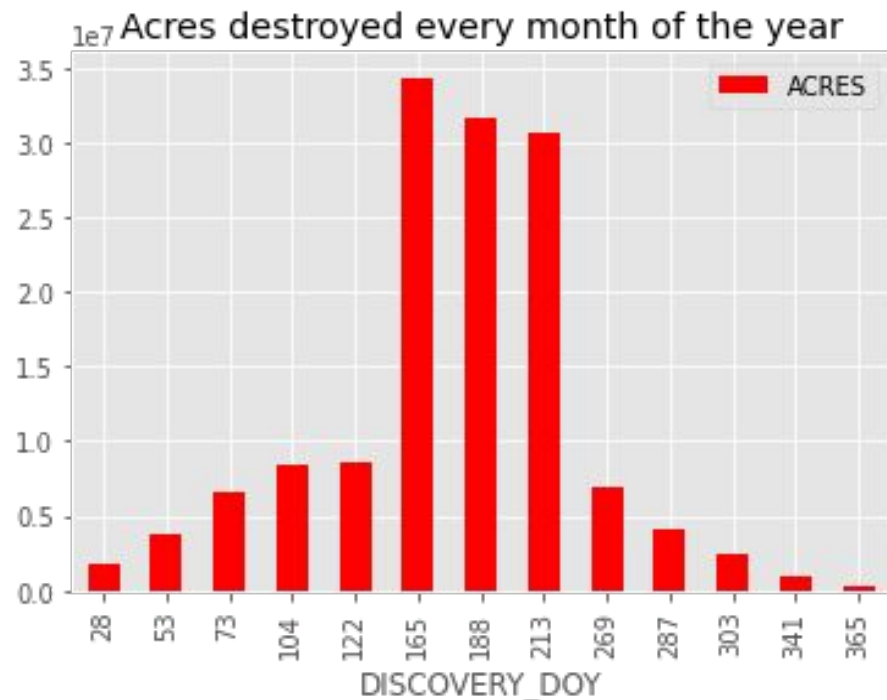

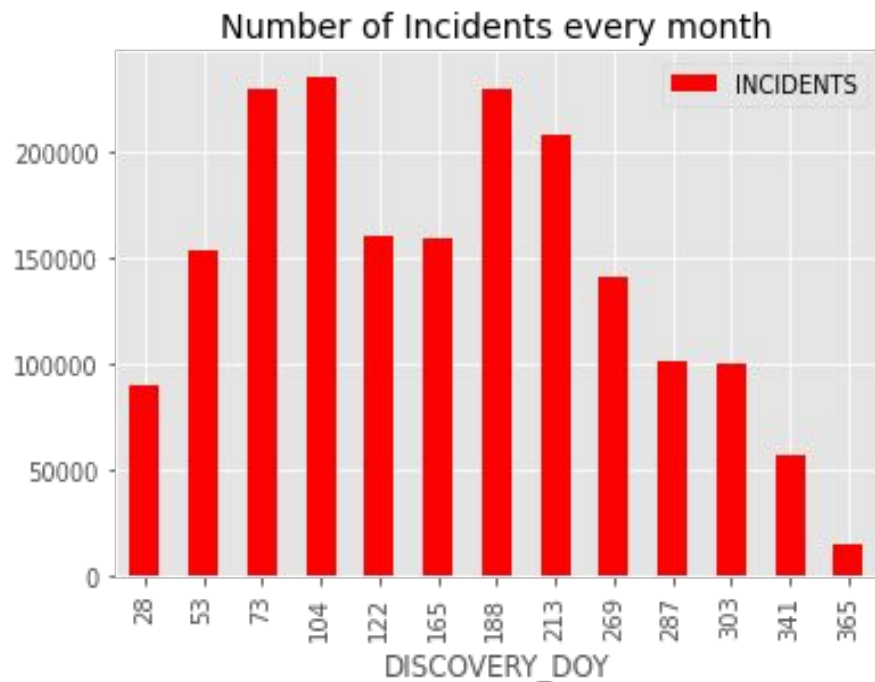

Heat Map of US wildfires

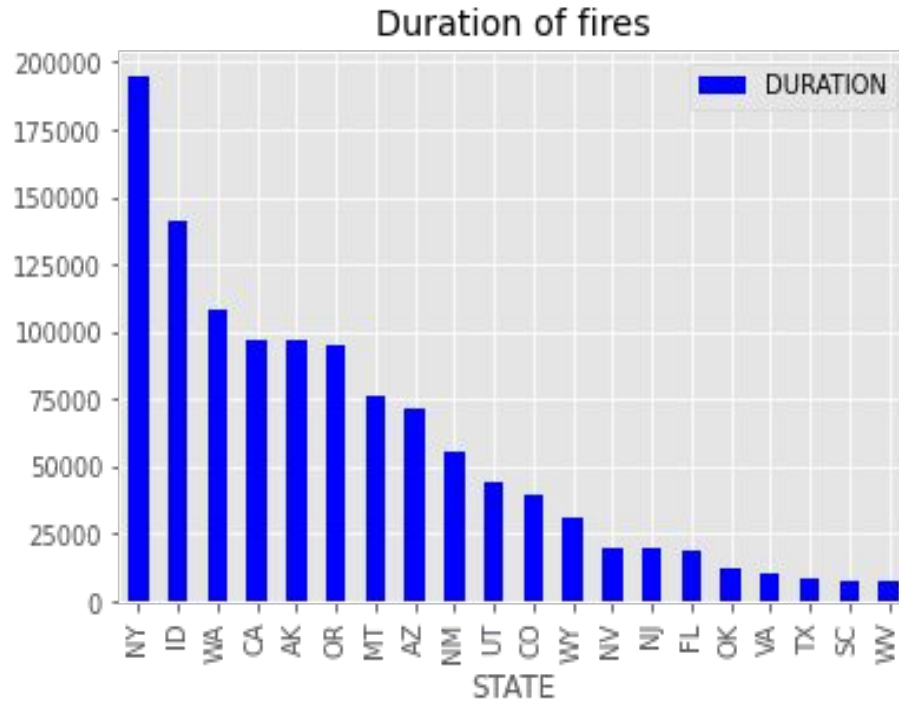

Average size of wildfires occurring from 1992 to 2015 (lighter color means bigger fire)

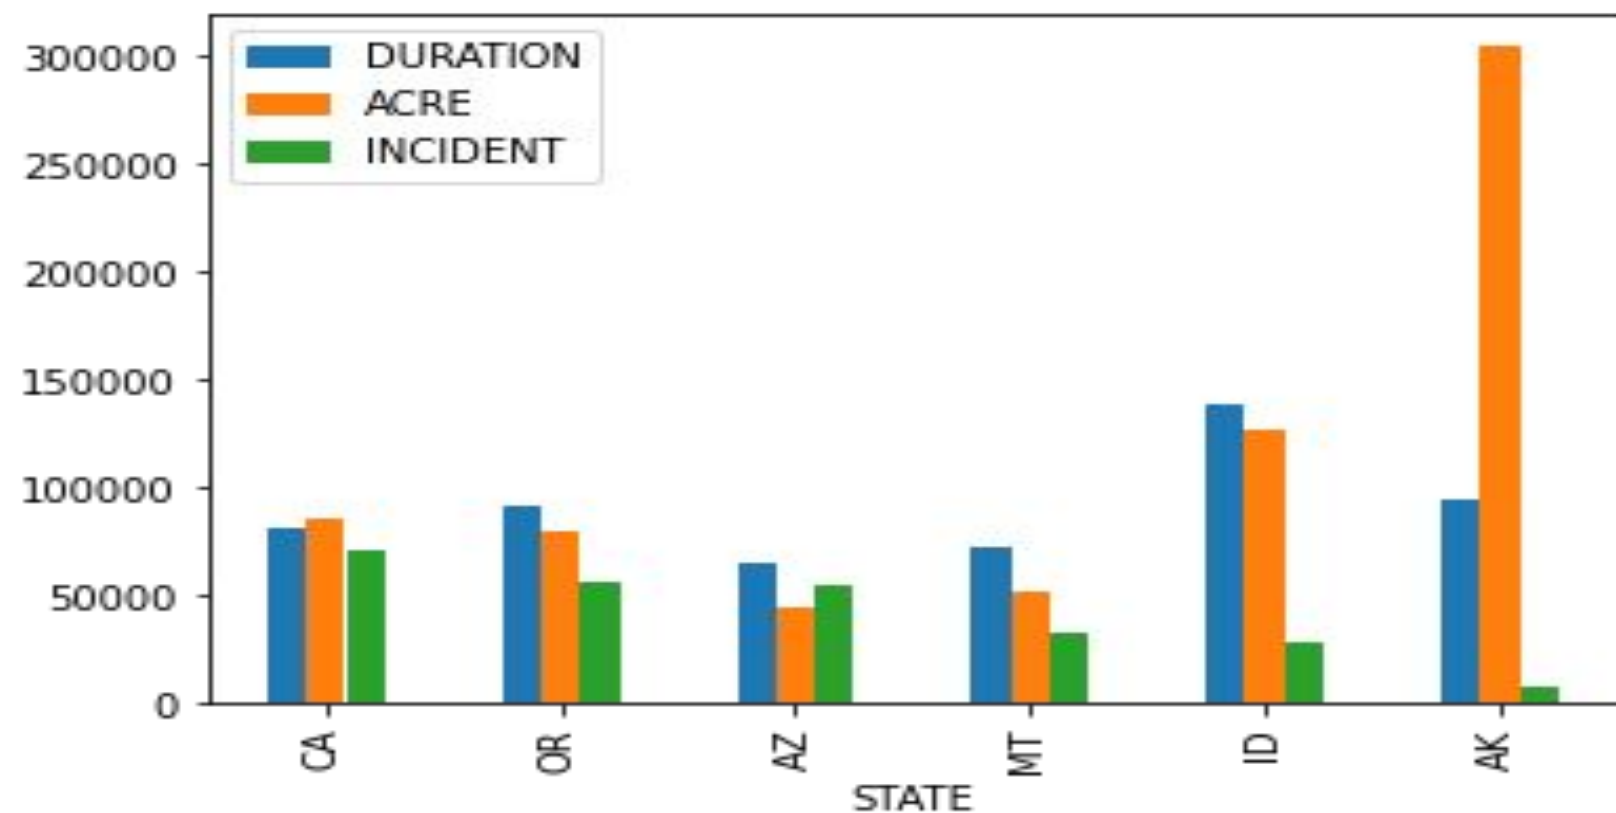

Does the season have an influence?

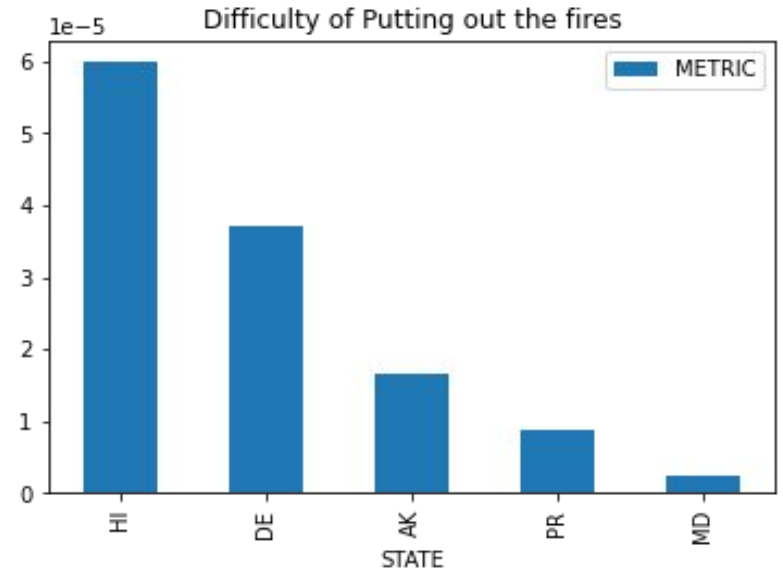

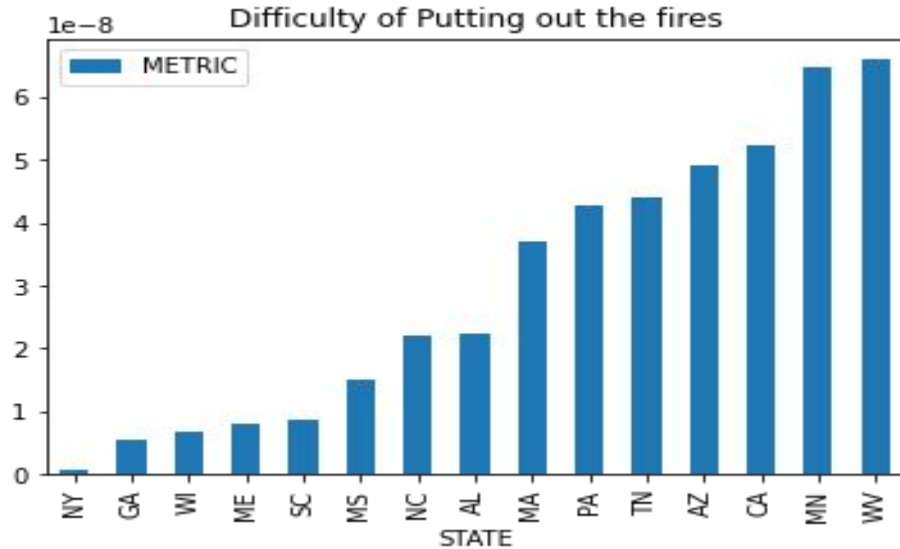

Duration of the fires

Duration vs Area vs Incidents

Response metric of each state

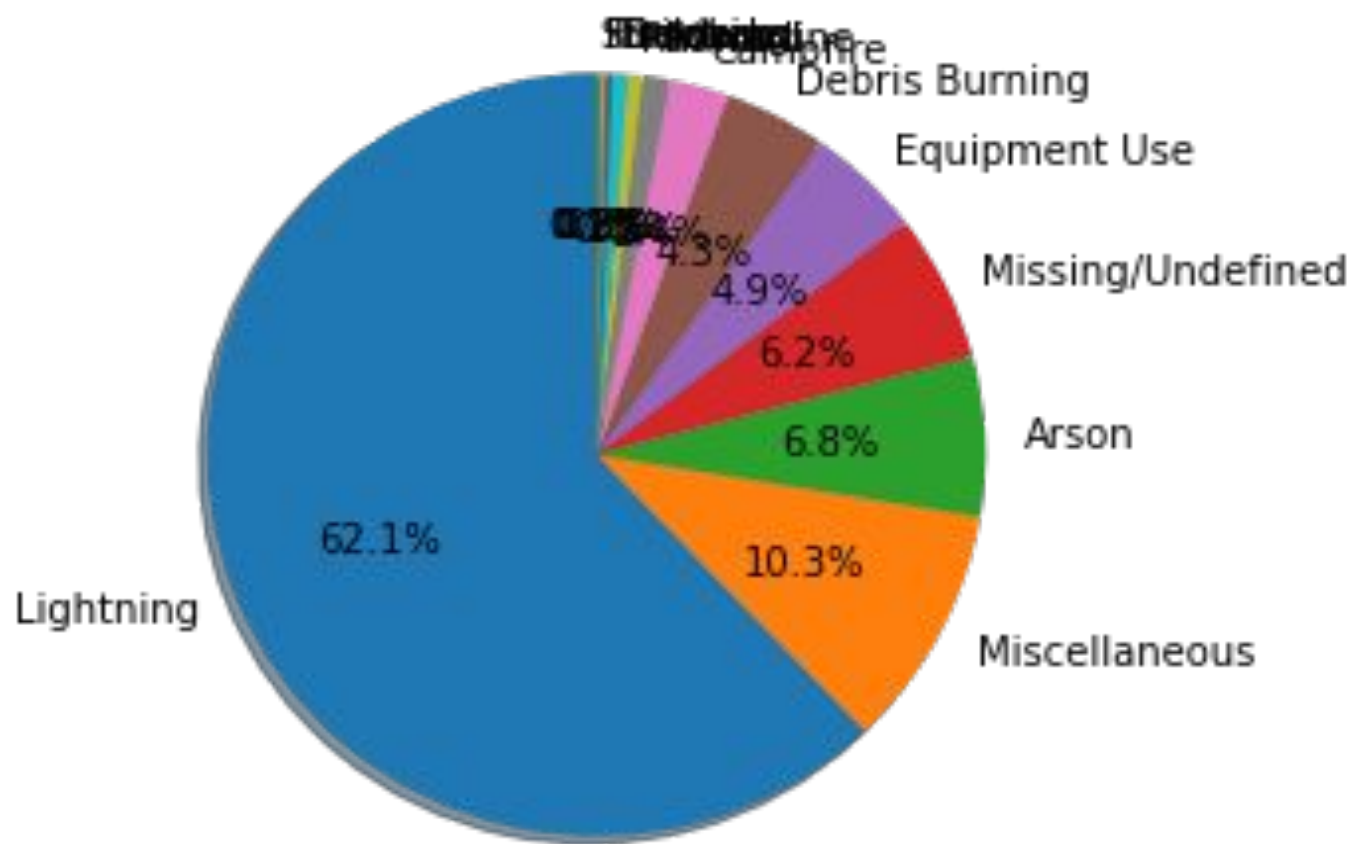

Lower the value, worsen the response

Fire Cause Distribution in US

Fire Cause Distribution - Area

Case Studies - NY, CA, TX

Size - Year

Size of Wildfires from 1992 to 2015 in US

Size of Wildfires from 1992 to 2015 in California

Size of Wildfires from 1992 to 2015 in TX

Size of Wildfires from 1992 to 2015 in NY

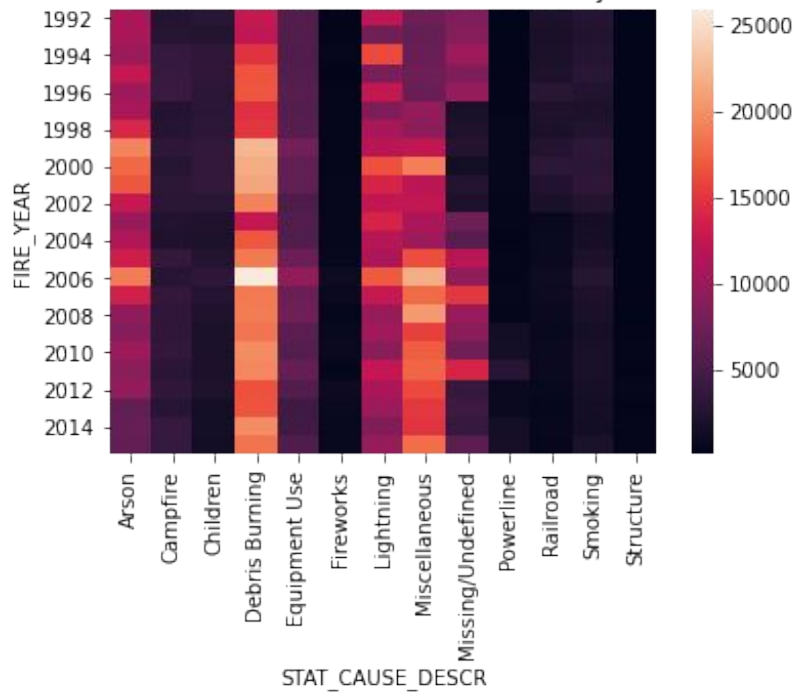

Relation between the Cause and the Fire Year

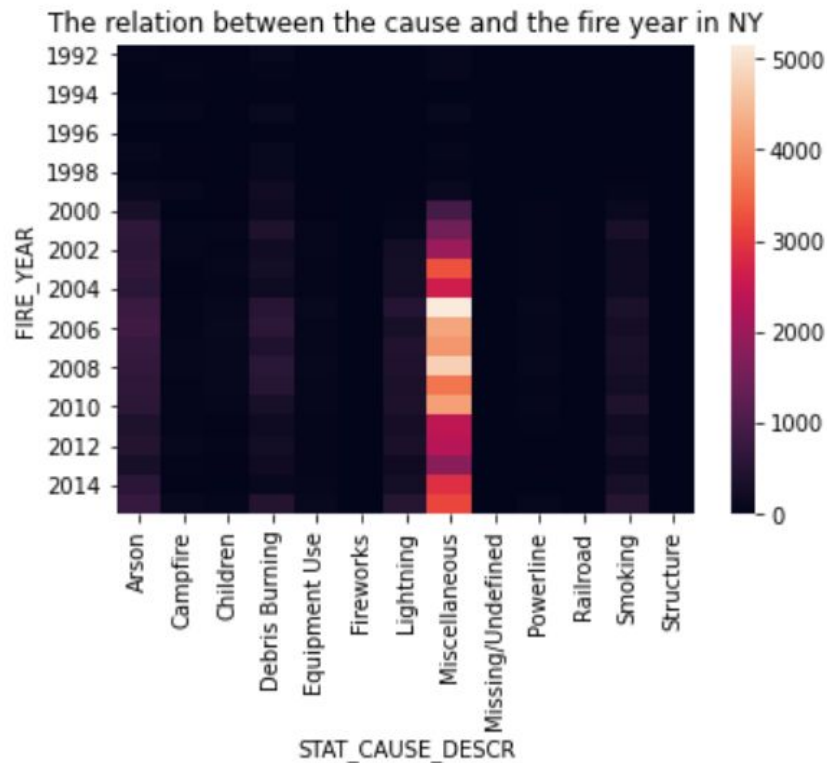

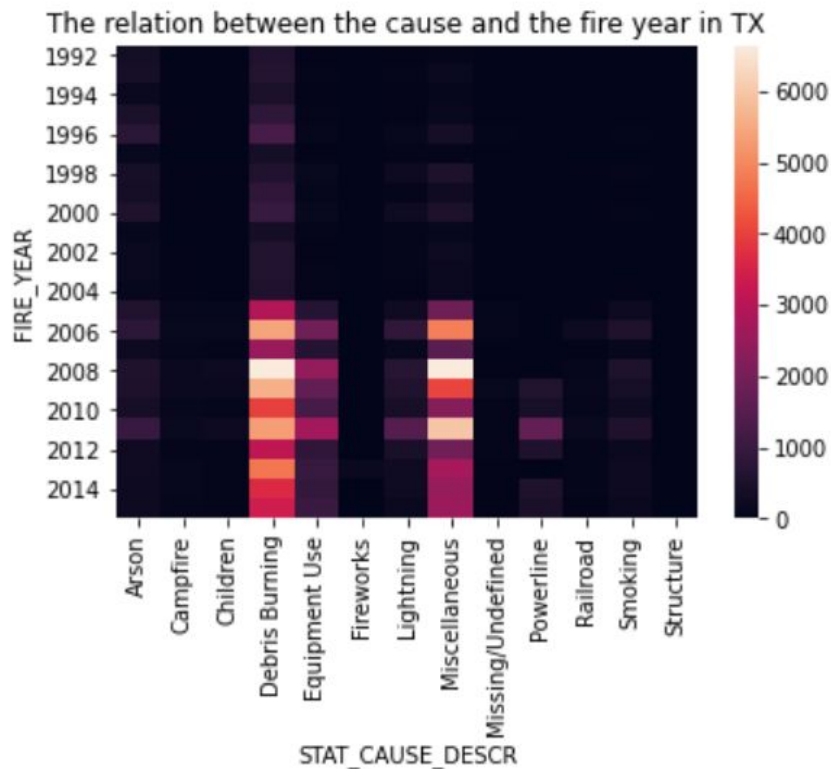

The relation between the cause and the fire year in California

The relation between the cause and the fire year in US

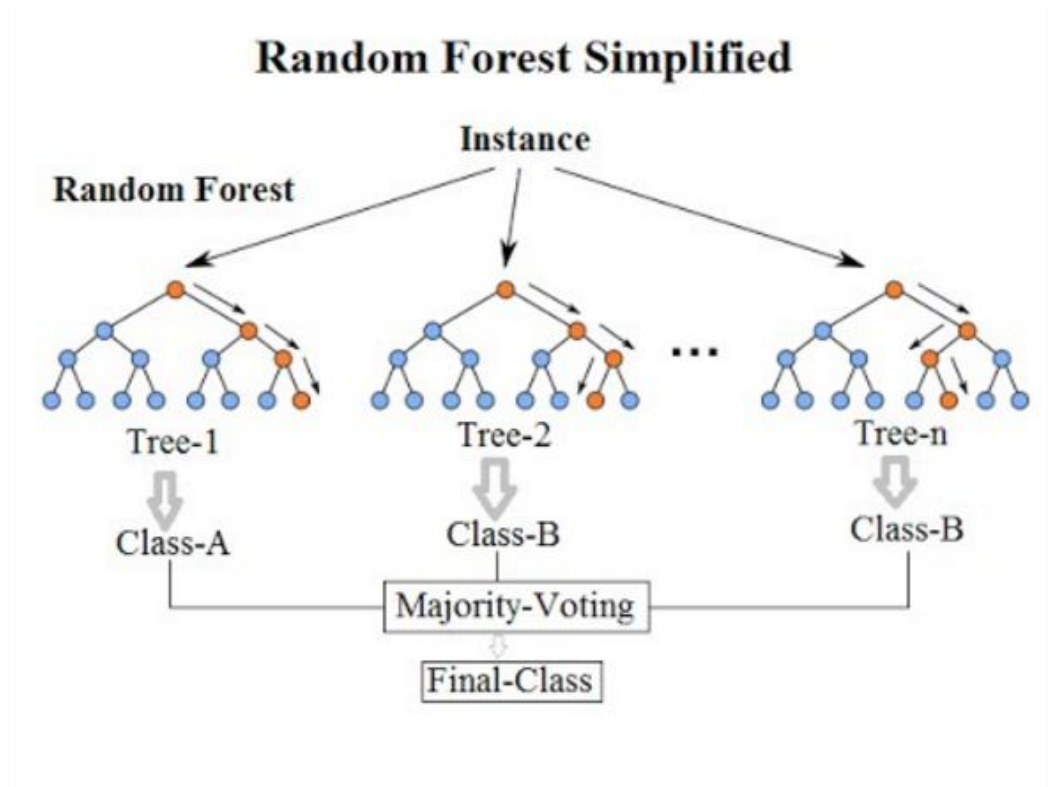

Relation between the Cause and the Fire Year

Cause Prediction

Random Forest

- Consists of Decision Trees
- Takes majority voting to output final prediction.

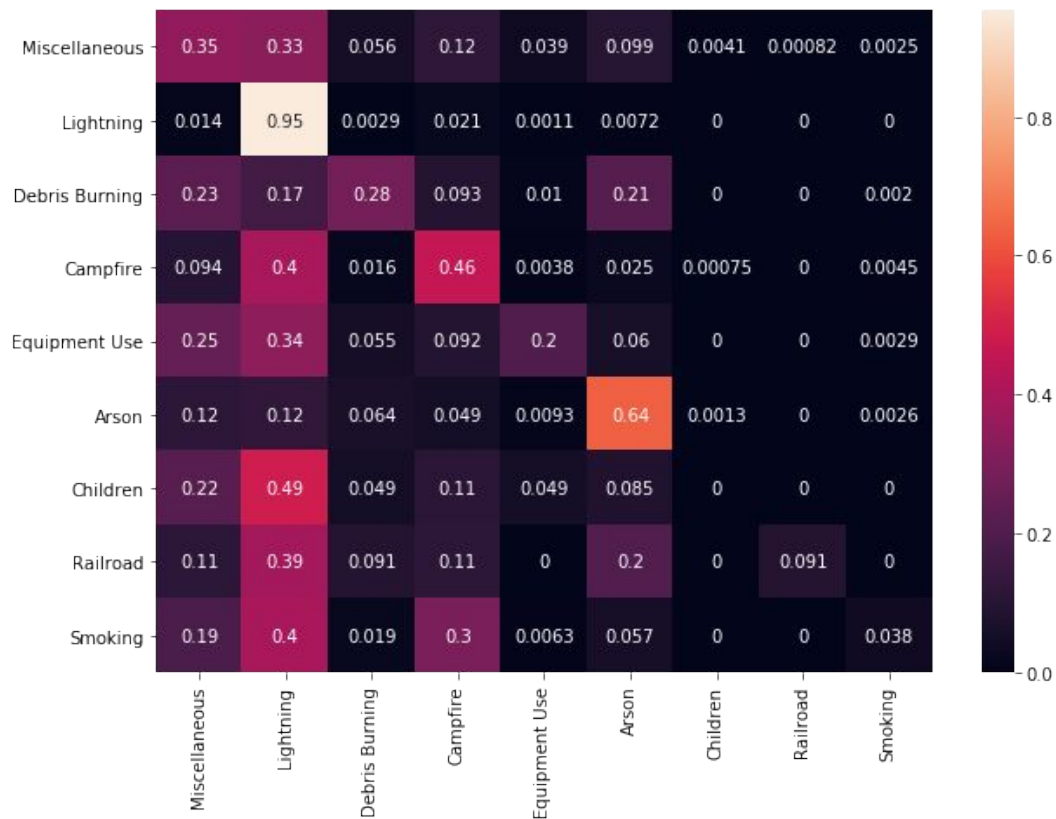

Prediction Result

- Initial Result produced 69% accuracy.
- Grid Search to look for better parameters.
- Optimal parameters yield 70.4% accuracy.

Parameters we used
for Grid Search

```
n_estimators = [200, 300]  
max_depth = [5, 15, None]  
max_features = ['auto', 'sqrt', 'log2']  
criterion = ['gini', 'entropy']
```

Confusion Matrix

- Rows indicate the true labels and columns indicate the prediction results

Inferences

- California, Alaska and Idaho - have the worst fires every year
 - Containment of fires in Alaska is better when compared to California while New York is the has the most delayed response
 - Miscellaneous reason & Lightening are the top causes for fires
 - Western USA is more prone to fires than eastern/central
 - Summer is the most prominent season for forest fires
-

THANK YOU!

THANK YOU!
